

- ✍ Sometimes it can rain frogs when winds pick up frogs from ponds and lakes and blows them before dropping them on unsuspecting heads!
- ✍ The oldest known frog lived to be 40 years.
- ✍ Frogs breathe and drink through their skin.
- ✍ Frogs have small, cone-shaped teeth on their upper jaws and also on the roof of their mouths. These teeth hold their prey before the frog swallows it whole.
- ✍ Frogs can jump over 20 times their body height. If you could leap like a frog you would be able to jump over 100 feet!
